StormSafe® Clear Panels

- **Lightweight temporary storm protection**

- **Completely transparent-allows light inside and vision outside**

Made from super-tough polycarbonate

- **No sharp edges**

- **Clear panels are typically ½ the weight of steel panels**

- **Easy stacking for storage**

- **Will not shatter, rust, or corrode**

- **85% light transmission**

- **Seasonal or storm deployment typically by one person**

- **Single-story homes often do not require use of ladders**

- **Simple wing nut fasteners used at bottom of panels only when U-Header tracks are provided**

Excellent for commercial and residential applications where panels are desired to be left in place during the entire storm season.

- **Doesn't give a "boarded-up" appearance**

- **Provides security**

- **Panels won't yellow with age**

- **Custom heights**

- **Professionally installed tracks and fasteners**

- **Panel widths in 6", 12" & 24"**

Your product specialist will determine the proper hardware set up to meet local building codes and to optimize panel width sizes for each protected opening.
