

PHARMACY **and** KIOSK SECURITY

Pharmacy

CounterSafe® security shutters may be solid slat or more commonly with the perforated Punch 51 slat to enable airflow between the pharmacy and the store without any sacrifice in security. QMI® rolling shutters may be up to 30 feet wide and up to 15 feet tall to protect most any straight line application.

- Reduces theft & “smash & grabs”
- Protects inventory
- Easy to operate
- Solid and punched shutter curtain styles
- Smallest box housing available

Kiosk & Counters

CounterSafe rolling shutters are perfect for protecting valuable merchandise that is kept behind a counter. Perfect for preventing theft, CounterSafe shutters are used in pharmacies, press boxes, stadiums, concession stands, food counters, and much more!

Rolling counter shutters provide a security barrier that is quick to deploy and easy-to-use. QMI counter shutters can be installed on the interior of the application to give it a sleek look.

Pharmacy

Side Folding Grilles may have curved top tracks for open pharmacy configurations and the curtain stack is often hidden in a side pocket.

QMI's new LX6 rolling shutter utilizes clear polycarbonate inserts which are 250X stronger than glass, yet provides maximum visibility.

Kiosk

The counter shutter can be securely locked with a slide bolt or keylock sideways into the mortised side rails, keeping the counter clear. Push-up/pull-down operation is easy to deploy, enabling employees to secure an area in just a few seconds.
