

StormSafe® Colonial Shutters

- Colonial shutters enhance the traditional look of your home while offering everyday use and protection
- While still allowing a breeze, colonial shutters provide shading protection from the sun when closed
- The added privacy benefit of colonial shutters reduces the need for interior window blinds or shutters
- Allows light and air flow in closed position while still providing you protection.

Roll-a-way Colonial Shutters are impact rated. Made from reinforced aluminum, these shutters pass the large and small missile impact test and meet HVHZ's stringent requirements.

Highlights your home and offers ready storm protection. You don't have to worry about storms arriving while you are away or finding time to install heavy and dangerous metal panels or plywood.

- No tools
- No motors
- No storage
- Professional Installation
- No lifting
- No painting
- No interior blinds necessary

SSCS 10 V2-1500

Colonial shutters provide the look of conventional wooden shutters with years of trouble-free finish and storm protection performance.

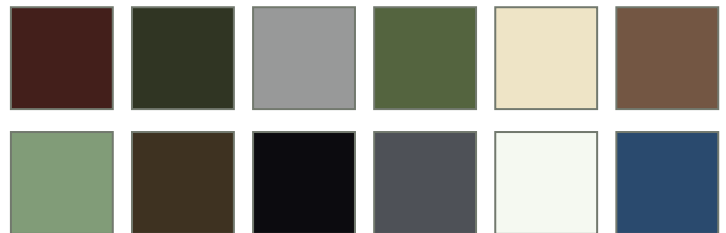

Full swing hinge enables daily use to provide privacy, or engage storm bars for extreme storm conditions.

Aluminum construction increases strength and decreases maintenance. Unlike wood shutters, Roll-a-way Colonial Shutters will not rot and won't require regular painting.

Durable powder coat finish in twelve colors. Accent your home with years of maintenance-free enjoyment.
